## Status Quo for Calgary's Housing Market

*Prices remain similar to last year, but ease in October.*

**City of Calgary, November 1, 2017** – October's housing market conditions closely echoed previous month's trends with easing sales, rising inventories and downward price pressure. Like last month, the monthly activity was not enough to derail gains that occurred earlier in the year.

October sales and inventories totaled 1,467 and 6,463 units for a month of supply of 4.4. Several months of elevated supply in comparison to demand has weighed on pricing over the past several months. The city-wide unadjusted benchmark price in October totaled \$438,900, 0.6 per cent below last month, but comparable to last year.

"While economic activity has improved in 2017, it will take some time for this to translate into housing market growth. There have been employment gains, but most of this has occurred in areas with traditionally lower income," said CREB® chief economist Ann-Marie Lurie.

"We also continue to face weak migration, higher lending rates and changes to lending policy. The combination of these factors is impacting housing demand, which is prolonging the pace of recovery."

Resale inventory gains occurred in each product type and across most districts in the city. The largest gains were in districts with substantial new development growth.

In the detached segment, the largest number of units added to inventory occurred in the \$300,000 - \$500,000 price range. This represents nearly 42 per cent of all detached inventory. 62 per cent of the inventory in the city-wide market is priced below \$500,000.

"There is far more product availability in the lower price ranges now compared to several years ago," said CREB® president David P. Brown.

"This provides more options for potential buyers concerned about their purchasing power given all the changes in the lending market."

The largest monthly price change occurred in the apartment condominium sector which recorded an unadjusted monthly decline of 0.8 per cent, resulting in a 13 per cent spread over monthly highs recorded in 2014.

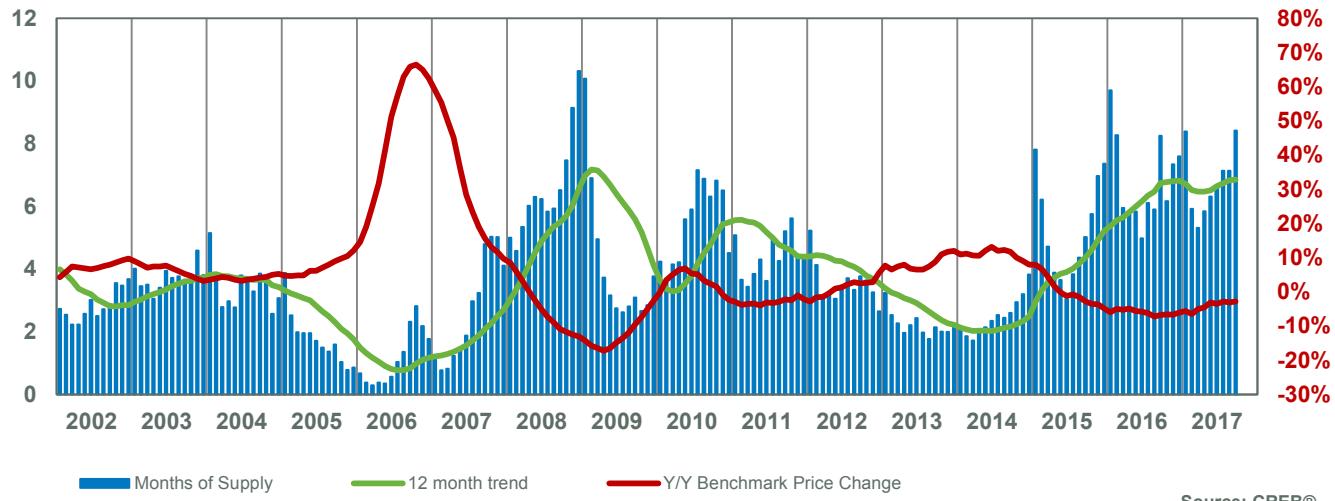

Despite some recent adjustments, prices in the attached and detached segments remain relatively stable compared to last year.

## HOUSING MARKET FACTS

- Slower detached sales in October was not enough to derail earlier gains, as year-to-date sales improved in almost all districts in the city.
- On average, detached prices this year have improved in most districts of the city. The largest gains were in the west district, pushing prices to levels comparable with previous highs.
- Apartment condominium product continues to see more supply than demand with October months-of-supply figures remaining just above seven months. Most of the inventory is located within the city center, but there has been gains in most districts causing excess supply in all areas of the city.
- The semi-detached segment of the market continues to see the best annual price improvement. As of October, prices totaled \$419,400, which 0.10 per cent below last month and three per cent above last year's levels. This is partially due to the improved demand for this type of product. While year-to-date sales have improved, this is the only sector that has seen sales rise above longer-term averages.

\*See district map on last page.

## City of Calgary

### DEFINITIONS

**Benchmark Price** - Represents the monthly price of the typical home based on its attributes such as size, location and number of bedrooms.

**MLS® Home Price Index** - Changes in home prices by comparing current price levels relative to January 2005 price level.

**Absorption Rate** - Refers to the ratio between the amount of sales occurring in the market relative to the amount of inventory.

**Months of Supply** - Refers to the ratio between Inventory and sales which represents at the current pace of sales how long it would take to clear existing inventory.

**Detached** - A unit that is not attached to any other unit.

**Semi-detached** - A single dwelling built as one of a pair that share one common wall.

**Row** - A single dwelling attached to each other by a common wall with more than two properties in the complex.

**Attached** - Both row and semi-detached properties.

**Apartment** - A unit within a high rise or low rise condominium building with access through an interior hallway.

**Total Residential** - Includes detached, attached and apartment style properties.

**Exclusions** - Data included in this package do not include activity related to multiple-unit sales, rental, land or leased properties.

### ABOUT CREB®

CREB® is a professional body of more than 5,100 licensed brokers and registered associates, representing 245 member offices. CREB® is dedicated to enhancing the value, integrity and expertise of its REALTOR® members. Our REALTORS® are committed to a high standard of professional conduct, ongoing education, and a strict Code of Ethics and standards of business practice. Any use or reference to CREB® data and statistics must acknowledge CREB® as the source. The board does not generate statistics or analysis of any individual member or company's market share. All MLS® active listings for Calgary and area may be found on the board's website at [www.creb.com](http://www.creb.com). CREB® is a registered trademark of the Calgary Real Estate Board Cooperative. The trademarks MLS® and Multiple Listing Service® are owned by the Canadian Real Estate Association (CREA) and identify the quality of services provided by real estate professionals who are members of CREA. The trademarks REALTOR® and REALTORS® are controlled by CREA and identify real estate professionals who are members of CREA, and subsequently the Alberta Real Estate Association and CREB®, used under licence.
